

## SCHNORR®

DISC SPRING ENGINEERING

As a pioneer in disc spring applications, Adolf Schnorr founded the owner-run family company in 1908. Today, SCHNORR® has grown into an internationally leading solution provider in the field of disc springs and screw locking devices.

We specialize in developing tailor-made solutions in co-operation with our customers. New fields of application, increasing quality and capability requirements or specific materials - in our inhouse testing facility skilled engineering experts do their utmost to meet customers needs and to comply with quality standards.
